## ABOUT ME.

After spending a year at Concordia refreshing my skills as a designer, I'm ready to get back to the industry and to working again. I love the fast pace of the design world. I'm an avid multi-tasker, and have a wide range of skills. I have training and experience in print, web, motion graphics, video editing, sound editing, and photography. If possible, a position that takes advantage of all those skills would be wonderful, although I'm also open to learning new skills as well! Please take a look at my online portfolio [tifilis.nerdly.org](http://tifilis.nerdly.org) to see a few of the projects that I've already worked on.

# EXPERIENCE.

---
